The Wrong Number VI BBS

Updated: 12/23/2023 – Birthday 05/01/2023

The Wrong Number VI BBS consists of the following:

Commodore 64 (Emulated)

Lt Kernal 160 Meg Hard Drive (Emulated)

19.2k Swiftlink (Emulated)

The original Wrong Number][BBS in all of it's glory from the day it was taken down 5/1/1993 Exactly the same as it was that day, only difference is the user base is new and the sub boards are new. Everything else from the AutoMessages to the Graphic screens are the same. Including the file library from 1993 with some hard to find files from that time still preserved on this BBS. Give it a call via your favorite Color Graphics Term program or click on the Telnet to CBM BBS' link on the top of this page and then click on the graphic screen of the Wrong Number][Retro graphic and you will be taken to the BBS.
